Subject Index of Volume 57

Acetic acid
activity of Co—Br—Py catalysts during oxidation of *p*-xylene in, 105
Acetone hydrogenation
exceptional susceptibility of ceria-supported Rh catalyst to inhibitory SMSI effects including, 379
Acetophenone
asymmetric hydrosilylation of Schiff base of, catalyzed by Rh(AMPP) complexes, L5
Activated carbon
epoxidation of olefin with alkyl hydroperoxide catalyzed by Mo complex supported on, 361
Active sites
simple method for determination of, of polymer-anchored complexes, 237
Alcohol(s)
novel basic ligands for homogeneous catalytic carbonylation of methanol: kinetic investigations of methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
catalytic mechanism of photodecomposition of H_2O with Ti(IV) complex formed from polymerized n-butyl-orthotitanate and methanol, 139
directionality of H_2O toward dehydrogenation in allylic alcohol oxidation using Ti–H_2O_2 catalyst systems, 201
effect of foreign ion additives on ceria surface reactivity towards isopropanol adsorption and decomposition: IR investigation, 367
geometric factors in dehydration of, on alumina: comparison of accessibility of Lewis and Brönsted acid sites on (100) surface, 125
promotion effect of mixed halides on homogeneous Ru catalysts in direct synthesis of ethanol from hydrogen and CO, 113
relation between catalyst structure and selectivity of oxidative coupling of 2,6-dimethylphenol in presence of Cu complexes: studies using EPR and NMR, 325
selective hydrogenation of furfuryl alcohol to tetrahydrofurfuryl alcohol, 397
Aldehyde
novel basic ligands for homogeneous catalytic carbonylation of methanol: kinetic investigations of methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
ethylene and formaldehyde chemisorption on small Ni(111) and NiAl clusters: extended Hückel calculations, 165
hydroformylation of formaldehyde to glycolaldehyde with homo- and heterometallic catalytic systems involving metal carbonyl species in different oxidation states, 221
kinetics and mechanism of reductive carbonylation of nitrobenzene catalyzed by dichlorobis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(III), 307
reduction of CO_2 by molecular H to formic acid and formaldehyde and their decomposition to CO and H_2O, 47
Alkali metal catecholates
reaction of, with dioxygen in aprotic solvents, L17
Alkanes
catalytic functionalization of: evidence for attractive steric effects in reactions of rhodium carbenoids, 149
transformation of compounds containing C—N bonds on heterogeneous catalysts: new metal-catalyzed reaction; isomerization of 1,3-oxazacycloalkanes to carboxamides on Pd, 1
Alkenes, Olefins
dialkoxydinitrosylmolybdenum compounds as olefin metathesis

© Elsevier Sequoia/Printed in The Netherlands

precatalysts: catalyst formation and electronic structure, 207
epoxidation of olefin with alkyl hydroperoxide catalyzed by Mo complex supported on activated carbon, 361
ethylene and formaldehyde chemisorption on small Ni(111) and NiAl clusters: extended Hückel calculations, 165
hydrogenation and isomerization of, over alkali metal–graphite intercalation compounds, 13
micellar catalysis of oxidation of 1,4-dihydronicotinamides by methylene blue, 417
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Ir(I) complexes of phosphine donor ligands, 29
Alkyl hydroperoxide
epoxidation of olefin with, catalyzed by Mo complex supported on activated carbon, 361
Aluminium
ethylene and formaldehyde chemisorption on small Ni(111) and NiAl clusters: extended Hückel calculations, 165
geometric factors in dehydration of alcohols on alumina: comparison of accessibility of Lewis and Brönsted acid sites on (100) surface, 125
Aprotic solvents
reaction of alkali metal catecholates with dioxygen in, L17
Aromatic compounds
activity of Co—Br—Py catalysts during oxidation of *p*-xylene in acetic acid, 105
asymmetric hydrosilylation of Schiff base of acetophenone catalyzed by Rh(AMPP) complexes, L5
benzyl ether from phase transfer catalyzed strongly alkaline hydrolysis of benzyl chloride, 271
homogeneous catalytic polymerization of benzyl chloride leading to linear high molecular weight polymers: elusive goal, 313
hydroformylation of vinyl acetate using homogeneous $HRh(CO)(PPh_3)_3$ catalyst: kinetic study, 177
hydrogen peroxide oxidation of alkyl aromatic hydrocarbons catalyzed by Keggin-type polyoxometalates, L1
kinetics and mechanism of reductive carbonylation of nitrobenzene catalyzed by dichlorobis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(III), 307
oxygenation of indoles catalyzed by bis(acetylacetonato)oxovanadium(IV), L9
reductive carbonylation of nitrobenzene to phenylurethane catalyzed by Ru(III)–Schiff base complexes, 301
relation between catalyst structure and selectivity of oxidative coupling of 2,6-dimethylphenol in presence of Cu complexes: studies using EPR and NMR, 325
Azacycloalkanones
substituted: hydrogenolysis of C—N—bonds in; transformation of compounds containing C—N bonds on heterogeneous catalysis; preparation of sterically hindered amines and amino derivatives, 81

Bromine
activity of Co—Br—Py catalysts during oxidation of *p*-xylene in acetic acid, 105

Carbonylation
homogeneous catalytic, of methanol: novel basic ligands for; kinetic investigations of methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
reductive, of nitrobenzene catalyzed by dichlorobis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(III); kinetics and mechanism of, 307
reductive, of nitrobenzene to phenylurethane catalyzed by Ru(III)–Schiff base complexes, 301
Carboxamides
isomerization of 1,3-oxazacycloalkanes to, on Pd; transformation of compounds containing C—N bonds on heterogeneous catalysts; new metal-catalyzed reaction, 1

Ceria
effect of foreign ion additives on ceria surface reactivity towards isopropanol adsorption and decomposition: IR investigation, 367
exceptional susceptibility of ceria-supported Rh catalyst to inhibitory SMSI effects including acetone hydrogenation, 379
Chalmydomonas reinhardtii
prosthetic components and essential groups for activity in ferredoxin–nitrite reductase from, 259
Chemisorption
ethylene and formaldehyde, on small Ni(111) and NiAl clusters: extended Hückel calculations, 165
Clusters
small Ni(111) and NiAl: ethylene and formaldehyde chemisorption on; extended Hückel calculations, 165
C—N bonds
transformation of compounds containing, on heterogeneous catalysis: hydrogenolysis of C—N— bonds in substituted azacycloalkanones; preparation of sterically hindered amines and amino derivatives, 81
new metal-catalyzed reaction; isomerization of 1,3-oxazacycloalkanes to carboxamides on Pd, 1
Cobalt
activity of Co—Br—Py catalysts during oxidation of *p*-xylene in acetic acid, 105
novel basic ligands for homogeneous catalytic carbonylation of methanol: kinetic investigations of methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
Copper
relation between catalyst structure and selectivity of oxidative coupling of 2,6-dimethylphenol in presence of Cu complexes: studies using EPR and NMR, 325

Decomposition
effect of foreign ion additives on ceria surface reactivity towards isopropanol adsorption and decomposition: IR investigation, 367
reduction of CO_2 by molecular H to formic acid and formaldehyde and their decomposition to CO and H_2O, 47
Dehydration
geometric factors in, of alcohols on alumina: comparison of accessibility of Lewis and Brönsted acid sites on (100) surface, 125
Dehydrogenation
directionality of H_2O toward, in allylic alcohol oxidation using Ti–H_2O_2 catalyst systems, 201
Dihydronicotinamides
1,4-; micellar catalysis of oxidation of, by methylene blue, 417

Epoxidation
of olefin with alkyl hydroperoxide catalyzed by Mo complex supported on activated carbon, 361
Ether
novel basic ligands for homogeneous catalytic carbonylation of methanol: kinetic investigations of methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
benzyl, from phase transfer catalyzed strongly alkaline hydrolysis of benzyl chloride, 271

Ferredoxin
–nitrite reductase from *Chalmydomonas reinhardtii*; prosthetic components and essential groups for activity in, 259
Formic acid
and formaldehyde; reduction of CO_2 by molecular H to, and their decomposition to CO and H_2O, 47
Furan
and its derivatives; hydroxylmethylation of, in presence of cation-exchange resins, 91
Furfuryl alcohol
selective hydrogenation of, to tetrahydrofurfuryl alcohol, 397

Graphite
hydrogenation and isomerization of olefins over alkali metal–graphite intercalation compounds, 13

Halides
mixed; promotion effect of, on homogeneous Ru catalysts in direct

synthesis of ethanol from hydrogen and CO, 113
transition metal: MgH_2 as reducing agent in presence of; reduction of organic halides, 23
Hückel calculations
extended; ethylene and formaldehyde chemisorption on small Ni(111) and NiAl clusters, 165
Hydroformylation
of formaldehyde to glycolaldehyde with homo- and heterometallic catalytic systems involving metal carbonyl species in different oxidation states, 221
homogeneously-catalyzed, reactions: phospholes as ligands for Rh systems in; optimization of reaction parameters and comparison of different catalytic systems, 153
of vinyl acetate using homogeneous $HRh(CO)(PPh_3)_3$ catalyst: kinetic study, 177
Hydrogen
and CO; promotion effect of mixed halides on homogeneous Ru catalysts in direct synthesis of ethanol from, 113
reduction of CO_2 by molecular H to formic acid and formaldehyde and their decomposition to CO and H_2O, 47
Hydrogenation
acetone; exceptional susceptibility of ceria-supported Rh catalyst to inhibitory SMSI effects including, 379
enantioselective, of α-ketoesters: influence of reaction medium and conversion, 245
homogeneous; thermodynamics of, of cyclohexene catalyzed by Ir(I) complexes of phosphine donor ligands, 29
and isomerization of olefins over alkali metal–graphite intercalation compounds, 13
liquid-phase, of optically active compound over Pd/SiO_2 catalysts; self-recognition in, 353
selective, of furfuryl alcohol to tetrahydrofurfuryl alcohol, 397
Hydrogenolysis
of C—N— bonds in substituted azacycloalkanones: transformation of compounds containing C—N bonds on heterogeneous catalysis, prepation of sterically hindered amines and amino derivatives, 81
Hydrogen peroxide
directionality of H_2O toward dehydrogenation in allylic alcohol oxidation using $Ti–H_2O_2$ catalyst systems, 201
oxidation of alkyl aromatic hydrocarbons catalyzed by Keggin-type polyoxometalates, L1
Hydrolysis
phase transfer catalyzed strongly alkaline, of benzyl chloride; benzyl ether from, 271
Hydrosilylation
asymmetric, of Schiff base of acetophenone catalyzed by Rh(AMPP) complexes, L5
Hydroxylmethylation
of furan and its derivatives in presence of cation-exchange resins, 91

Immobilization
inorganic gels for, of biocatalysts: inclusion of invertase-active whole cells of yeast (*Saccharomyces cerevisiae*) into thin layers of SiO_2 gel deposited on glass sheets, L13
Invertase
inorganic gels for immobilization of biocatalysts: inclusion of invertase-active whole cells of yeast (*Saccharomyces cerevisiae*) into thin layers of SiO_2 gel deposited on glass sheets, L13
Iridium
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Ir(I) complexes of phosphine donor ligands, 29
Isomerization
and hydrogenation of olefins over alkali metal–graphite intercalation compounds, 13
of 1,3-oxazacycloalkanes to carboxamides on Pd; transformation of compounds containing C—N bonds on heterogeneous catalysts; new metal-catalyzed reaction, 1

Keggin-type polyoxometalates
hydrogen peroxide oxidation of alkyl

aromatic hydrocarbons catalyzed by, L1
Ketoesters
α-: enantioselective hydrogenation of; influence of reaction medium and conversion, 245

Lanthanide
effect of, as counter ions on oxidation activity of molybdovanadophosphoric acid, 193
Lewis and Brönsted acid sites
comparison of accessibiltiy of, on (100) surface; geometric factors in dehydration of alcohols on alumina, 125

Magnesium
MgH_2 as reducing agent in presence of transition metal halides: reduction of organic halides, 23
Metathesis
olefin, precatalysts: dialkoxydinitrosylmolybdenum compounds as; catalyst formation and electronic structure, 207
Methylene blue
micellar catalysis of oxidation of 1,4-dihydronicotinamides by, 417
Micellar catalysis
of oxidation of 1,4-dihydronicotinamides by methylene blue, 417
Molybdenum
dialkoxydinitrosylmolybdenum compounds as olefin metathesis precatalysts: catalyst formation and electronic structure, 207
effect of lanthanide as counter ions on oxidation activity of molybdovanadophosphoric acid, 193
epoxidation of olefin with alkyl hydroperoxide catalyzed by Mo complex supported on activated carbon, 361

Nickel
ethylene and formaldehyde chemisorption on small Ni(111) and NiAl clusters: extended Hückel calculations, 165

Olefins, see Alkenes
Optical activity
self-recognition in liquid-phase hydrogenation of optically active compound over Pd/SiO_2 catalysts, 353
Oxidation
activity of Co—Br—Py catalysts during, of *p*-xylene in acetic acid, 105
activity; effect of lanthanide as counter ions on, of molybdovanadophosphoric acid, 193
allylic alcohol; directionality of H_2O toward dehydrogenation in, using $Ti–H_2O_2$ catalyst systems, 201
different, states; hydroformylation of formaldehyde to glycolaldehyde with homo- and heterometallic catalytic systems involving metal carbonyl species in, 221
hydrogen peroxide, of alkyl aromatic hydrocarbons catalyzed by Keggin-type polyoxometalates, L1
micellar catalysis of, of 1,4-dihydronicotinamides by methylene blue, 417
Oxidative coupling
relation between catalyst structure and selectivity of, of 2,6-dimethylphenol in presence of Cu complexes: studies using EPR and NMR, 325
Oxygen
reaction of alkali metal catecholates with dioxygen in aprotic solvents, L17
Oxygenation
of indoles catalyzed by bis(acetylacetonato)oxovanadium(IV), L9

Palladium
characterization by CO/FTIR spectroscopy of Pd supported on NaY zeolites, 61
isomerization of 1,3-oxazacycloalkanes to carboxamides on; transformation of compounds containing C—N bonds on heterogeneous catalysts; new metal-catalyzed reaction, 1
self-recognition in liquid-phase hydrogenation of optically active compound over Pd/SiO_2 catalysts, 353
Phosphorus
novel basic ligands for homogeneous catalytic carbonylation of methanol: kinetic investigations of

methanol carbonylation on acetaldehyde using ether–phosphane-modified cobalt catalyst, 291
effect of lanthanide as counter ions on oxidation activity of molybdovanadophosphoric acid, 193
hydroformylation of vinyl acetate using homogeneous HRh(CO)-$(PPh_3)_3$ catalyst: kinetic study, 177
phospholes as ligands for Rh systems in homogeneously-catalyzed hydroformylation reactions; optimization of reaction parameters and comparison of different catalytic systems, 153
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Ir(I) complexes of phosphine donor ligands, 29
Photodecomposition
catalytic mechanism of, of H_2O with Ti(IV) complex formed from polymerized n-butyl-orthotitanate and methanol, 139
Polymerization
homogeneous catalytic, of benzyl chloride leading to linear high molecular weight polymers: elusive goal, 313
Polymer(s)
-anchored complexes; simple method for determination of active sites of, 237
catalytic mechanism of photodecomposition of H_2O with Ti(IV) complex formed from polymerized n-butyl-orthotitanate and methanol, 139
linear high molecular weight: homogeneous catalytic polymerization of benzyl chloride leading to; elusive goal, 313

Reductase
ferredoxin–nitrite, from *Chalmydomonas reinhardtii*; prosthetic components and essential groups for activity in, 259
Reduction
of CO_2 by molecular H to formic acid and formaldehyde and their decomposition to CO and H_2O, 47
of organic halides; MgH_2 as reducing agent in presence of transition metal halides, 23
Resins
cation-exchange; hydroxylmethylation of furan and its derivatives in presence of, 91
Rhodium
asymmetric hydrosilylation of Schiff base of acetophenone catalyzed by Rh(AMPP) complexes, L5
catalytic functionalization of alkanes: evidence for attractive steric effects in reactions of rhodium carbenoids, 149
exceptional susceptibility of ceria-supported Rh catalyst to inhibitory SMSI effects including acetone hydrogenation, 379
hydroformylation of vinyl acetate using homogeneous HRh(CO)-$(PPh_3)_3$ catalyst: kinetic study, 177
phospholes as ligands for Rh systems in homogeneously-catalyzed hydroformylation reactions; optimization of reaction parameters and comparison of different catalytic systems, 153
Ruthenium
kinetics and mechanism of reductive carbonylation of nitrobenzene catalyzed by dichlorobis(salicylaldehyde)-*o*-phenylenediiminatoruthenate(III), 307
promotion effect of mixed halides on homogeneous Ru catalysts in direct synthesis of ethanol from hydrogen and CO, 113
reductive carbonylation of nitrobenzene to phenylurethane catalyzed by Ru(III)–Schiff base complexes, 301

Saccharomyces cerevisiae
inclusion of invertase-active whole cells of yeast, into thin layers of SiO_2 gel deposited on glass sheets; inorganic gels for immobilization of biocatalysts, L13
Schiff base
asymmetric hydrosilylation of, of acetophenone catalyzed by Rh(AMPP) complexes, L5
Ru(III)–Schiff base complexes; reductive carbonylation of nitrobenzene to phenylurethane catalyzed by, 301

Silicon
inorganic gels for immobilization of biocatalysts: inclusion of invertase-active whole cells of yeast (*Saccharomyces cerevisiae*) into thin layers of SiO_2 gel deposited on glass sheets, L13
self-recognition in liquid-phase hydrogenation of optically active compound over Pd/SiO_2 catalysts, 353
SMSI effects
inhibitory; exceptional susceptibility of ceria-supported Rh catalyst to, including acetone hydrogenation, 379
Spectroscopy
characterization by CO/FTIR spectroscopy of Pd supported on NaY zeolites, 61
effect of foreign ion additives on ceria surface reactivity towards isopropanol adsorption and decomposition: IR investigation, 367
relation between catalyst structure and selectivity of oxidative coupling of 2,6-dimethylphenol in presence of Cu complexes: studies using EPR and NMR, 325
Steric effects
attractive: evidence for, in reactions of rhodium carbenoids; catalytic functionalization of alkanes, 149
Surface
effect of foreign ion additives on ceria surface reactivity towards isopropanol adsorption and decomposition: IR investigation, 367
geometric factors in dehydration of alcohols on alumina: comparison of accessibility of Lewis and Brönsted acid sites on (100) surface, 125
Synthesis
direct; promotion effect of mixed halides on homogeneous Ru catalysts in, of ethanol from hydrogen and CO, 113

Thermodynamics
of homogeneous hydrogenation of cyclohexene catalyzed by Ir(I) complexes of phosphine donor ligands, 29
Titanium
catalytic mechanism of photodecomposition of H_2O with Ti(IV) complex formed from polymerized n-butyl-orthotitanate and methanol, 139
directionality of H_2O toward dehydrogenation in allylic alcohol oxidation using $Ti–H_2O_2$ catalyst systems, 201

Vanadium
effect of lanthanide as counter ions on oxidation activity of molybdovanadophosphoric acid, 193
oxygenation of indoles catalyzed by bis(acetylacetonato)oxovanadium-(IV), L9
Vinyl acetate
hydroformylation of, using homogeneous $HRh(CO)(PPh_3)_3$ catalyst: kinetic study, 177

Water
catalytic mechanism of photodecomposition of, with Ti(IV) complex formed from polymerized n-butyl-orthotitanate and methanol, 139
and CO; reduction of CO_2 by molecular H to formic acid and formaldehyde and their decomposition to, 47
directionality of, toward dehydrogenation in allylic alcohol oxidation using $Ti–H_2O_2$ catalyst systems, 201

Yeast
inorganic gels for immobilization of biocatalysts: inclusion of invertase-active whole cells of yeast (*Saccharomyces cerevisiae*) into thin layers of SiO_2 gel deposited on glass sheets, L13

Zeolites
NaY; characterization by CO/FTIR spectroscopy of Pd supported on, 61
